**18 - 3/21 PUNTARSKA DRAGA, bay: light****Directions,** Replace by:

**Directions:** The bay is entered through an approach channel marked by five light beacons. The E side of the channel is marked by three green light beacons - green towers on bases in the sea. Between the first and the second beacon there are remains of a former beacon. The W side of the channel is marked by two red light beacons: red column on base in the sea with topmark - red cylinder, and red column on concrete base in the sea; the extreme W end of the navigable area in Puntarska Draga is marked by a light - red column on concrete base in the sea SE of Košljun islet.

When entering the bay, the track leads past the first pair of light beacons, leaving the first light (entrance to channel I - green tower on base in the sea) about 15 m to starboard hand, and passes the masonry beacon which should remain to starboard hand. Then the track leads toward the third light (mid-channel III - green tower on base in the sea), which should remain to starboard hand. Immediately after passing this light, a course should be taken between the fourth and the fifth light (end of channel IV - red tower on concrete base in the sea, and end of channel V - green tower on base in the sea). Vessels can steer for the quay in Punat harbour by night when the light on the head of S mole comes into sight, and by day when at least 100 m from the fifth light (end of channel V - green tower on base in the sea) continuing in the same course.
